

I have 20 years of experience in global charity fundraising and management experience within the medical, science, environment, and global health fields. I have worked with Oxford Departments such as Medicine, Biochemistry, Environmental Change Institute, Life Sciences, Zoology, Geography Department, Archaeology and museums at Oxford University and London Universities. I have formed partnerships in the UK, EU, Canada/USA, India, South East Asia and East and Southern Africa.

I've raised over £285M with a variety of global donors and worked with UK universities and institutions. I co-founded a telemedicine start-up (NASDAQ exchange listed) and worked with doctors, surgeons and hospitals in the US/Canada, MIT, Boston and McGill Universities and with NASA. I also do digital access and assessment work.

Education, research, and systems change require funding and I have experience in medicine, health/environment and education charities with global donors and local donors. Also, I have over 10 years of Trustee experience to assist the board on communications, events, funding/grants, good governance and operations. I've served as a trustee of several large and small UK charities global health and scholarships, vision, seafarers, hospital procurement and climate charities for 10 years.

I hold an MSc in Human Biology (Oxford University), a more recent GDL London law degree as well as degrees in communications (McGill University) & biology from Canada. I'm a fellow of the ZSL London Zoo and Royal Society of Arts & Manufacturing. I enjoy reading newspapers and watching science podcasts, gardens, Pilates, scuba diving, snowboarding and island travel.
